

ABB AG - EPDS

**Test Laboratories in Ratingen** 

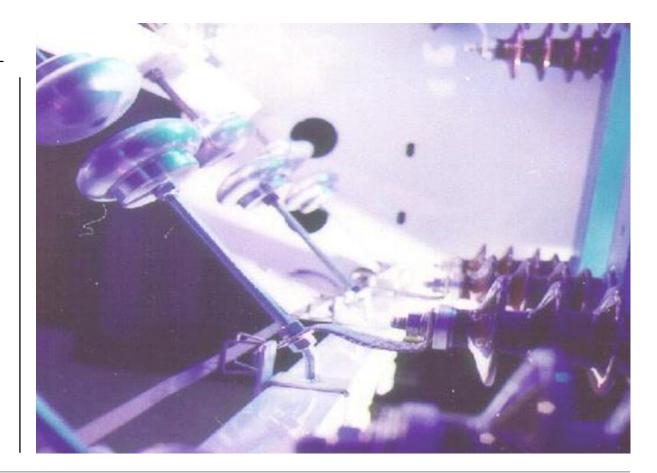

# **Test Laboratories Ratingen**

Overview

### **Basic Features**

- Flexible
- Independent
- Well experienced in testing of medium voltage equipment (testing since 1954)
- Founding Member of **PEHLA** (1960)
- Founding Member of **S**hort **C**ircuit **T**esting **L**iaison (1969)
- Accredited by DAkkS since 1993
- Very efficient testing due to a high automation standard allowinga quick adjustment of the required test circuit
- Size of laboratories: 4200 m2
- Participant in UL Client Test Data program 2015
- Recognized Intertek Satellite Laboratory since 2015

Accredited areas

#### **Testing laboratories**

- High power testing laboratory
- Temperature rise testing laboratory
- High voltage testing laboratory
- Mechanical testing laboratory
- Material testing laboratory
- Calibration laboratory

Accreditation by DAkkS

DAkkS is the national accreditation body of the Federal Republic of Germany. It acts in the public interest in accordance with Regulations (EC) No. 765/2008 and the German Accreditation Bodies Act (AkkStelleG) as the sole body providing accreditation in Germany

DAkkS is a member of the international accreditation organizations European Co-operation for Accreditation (EA), International Accreditation Forum (IAF) and International Laboratory Accreditation Cooperation (ILAC).

PEHLA

#### The members

**PEHLA** (Prüfung Elektrischer Hoch-Leistungs-Apparate) is an association of owners of high-power testing laboratories in Germany and Switzerland.

ABB	ABB Calor Emag Mittelspannung ABB Schweiz AG, High Voltage Products
ALSTOM GRID	ALSTOM Grid GmbH, High Voltage Products
FGH	Engineering & Test GmbH
IPH	Institut "Prüffeld für elektrische Hochleistungstechnik"
SCHNEIDER ELECTRIC	Schneider Electric Sachsenwerk GmbH
SIEMENS	Siemens Aktiengesellschaft (Frankfurt and Berlin)

Information about Short Circuit Testing Liaison (STL)

The members of STL are organizations which deal with the testing of high-power electrical components and have testing facilities with a short-circuit capacity of at least 500 MVA (e.g. 12 kV, 25 kA) in a three-phase test circuit.

The members are expert testing organizations which are independent of manufacturers and cooperate actively within STL.

PEHLA is a founding member of STL.

### **High Power Testing Laboratory**

#### Short-circuit making and breaking capacity

- Single-phase and three-phase
  - 50 kA at 12 kV
    31.5 kA at 17.5 kV
  - 25 kA at 24 kV
  - 16 kA at 40.5 kV

#### Switching capacity tests

- Capacitive, Inductive, Ohmic Load currents

#### Peak withstand and short time current tests

– Up to 250 kA<sub>peak</sub>; 100 kA<sub>rms</sub> (1-3 s)

#### Internal arc fault tests

- Up to 50 kA 1 s
- 63 kA 0.5 s

#### **Temperature Rise Test Laboratory**

Tests up to 5500 A

- Measurement of temperatures
- Up to 180 thermocouples
- Safety system allows to carry out tests over night
- Currents automatically controlled
- Continuously measurement of currents and temperatures Automatically calculation of temperature rises

### High Voltage Testing Laboratory

Power-frequency voltage tests

- Stationary up to 260 kV
- Mobile up to 230 kV
- Standard lightning impulse voltage tests
- Up to 800 kV

Partial discharge tests

- Stationary up to 150 kV
- Mobile up to 230 kV
- Background level < 1 pC</li>

### Mechanical Testing Laboratory

Mechanical operating tests Mechanical endurance tests Tests of interlocking systems Logic tests of control units Leakage tests High/low temperatures tests IK rating tests Pressure tests

#### Material Testing Laboratory

Accessible Climatic-Chamber

- Dimensions  $2 m (W) \times 2 m (H) \times 2 m (D)$
- Temperature range: -70 °C +130 °C /1K/min
- Humidity range: 10 98 %
- AC Test voltage (single phase): 100 kV

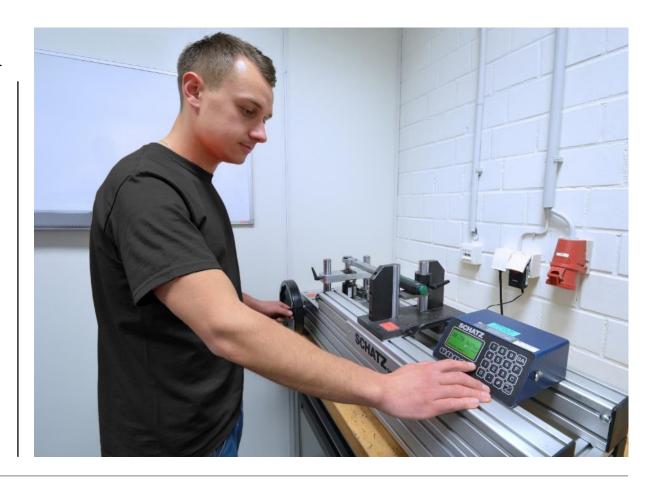

Accessible Climatic-Chamber

- Dimensions 2.4 m (W) x 3.5 m (H) x 3.2 m (D)
- Temperature range: -70 °C +150 °C /1K/min
- Humidity range: 10 98 %
- AC Test voltage (single phase): 70 kV

### **Mechanical Testing Laboratory**

Calibration of

- Electrical measuring instrument
- Force measuring instrument
- Length measuring instrument
- Torque wrenches
- Pressure measuring instrument

#### Workshop of Laboratories

Prototypes and test arrangements Assembly and installation services Repair services Mould, die and equipment construction Prototype assessment

### Which tests can be carried out

Products	Mv circuit- breaker	Metal enclosed switchgear	Power transformers	Disconnector & earthing switch	Switch fuse units	Earthing facility	Bushing	Instrument transformers	Fuses	Cable accessories	Auxiliary circuit	Substations
Making and Breaking test	•	٠		•	•				•		•	•
STC test	•	•	•	•		•	•	•		•	•	•

#### Our main services

Type testing

- Type certificates
- Test documents
- Test reports
- Development tests
- Approval tests (also outside our laboratories)
- Testing in an STL member laboratory
- Testing to obtain UL qualification for MV and LV products
- Testing to obtain Intertek (ETL) recognition for MV and LV products

### Available Accreditations

### PEHLA

German Accreditation Body PEHLA – Testing Station Ratingen

#### **Underwriters Laboratory**

Underwriters Laboratory (UL) Member of Client Data Program (CTDP)

#### Intertek

Intertek (ETL) Member of CTF (Customers Testing Facility Stage 3) at Intertek

	Testing Site Acceptance
	The following organization has been assessed and found to comply with the relevant requirements of ISO/IEC 17025 and the Interlek. Global Satellite Program Manual and accepted by Interlek as a Level

#### Why testing at our laboratories

- Over 50 years experience in testing of Medium Voltage Switchgear and Controlgear
- Efficient support during project planning and execution will be given by our test engineers
- Our workshop is specialized to support on a short time basis in case repair work or modifications on the test objects are required
- Short term availability of components for ABB products
- Whole range of mandatory type tests can be carried out in our test facility
- High Quality testing and flexible scheduling will be provided to our customers
