

Availability Spares for drives

Service product description

The Availability Spares service agreement helps optimize production uptime by providing instant availability of spares without large initial investment or inventory value. The selected spare parts for drives, large motors, generators, as well as spare drives are stored at your own premises or at an agreed location for an annual fee.

Value to you

- Increased production uptime with immediate availability of critical spares onsite or at an agreed upon location
- Optimized inventory value
- Initial capital investment is reduced

Service includes

- Defined set of spare parts for drives, large motors, and generators, spare drives or modules available at agreed upon location for an annual fee
- Contract period of five years
 - At the end of the contract term, customer retains the right to purchase the inventory at an agreed upon price
- 2-year warranty begins when a spare item is removed from inventory
- Annual physical inventory and capacitor reforming performed with ABB onsite

Your responsibilities

- Notification to ABB of spare consumption for replenishment
- Timely invoice payment for consumed spares
- Quarterly self-reported inventory conditions to maintain optimal inventory levels
- Storing of goods under recommended conditions
- Providing local ABB access for annual physical inventory and reforming the capacitors

Other terms

- According to local legislation and terms of delivery
- ABB owns the inventory through the agreement term
- Applicable to spare parts for drives, large motors, and generators, and spare drives and modules
- Spares inventory is stored and maintained on site according to ABB guidelines
- All spares are delivered with standard lead times for the start of the agreement and inventory replenishment
