
COURSE DESCRIPTION

G6401e – ABB drives for water ACQ580-01, -04 hardware features, Internet course

Course type

This is a web-based training course.

Course duration

The course duration is approximately 15 minutes.

Course goal

The goal of this course is to understand the hardware features of ACQ580 drives for water.

Student profile

This course is intended for sales managers, sales engineers, product managers, anyone selecting or dimensioning an ACQ580, or for anyone wanting to know what options and ratings are supported for ACQ580 drives for water.

Notes

If you have no experience of working with drives, it is highly recommended to take a hands-on course in addition to this course, to be able to utilize the drive to its full potential.

Prerequisites

An Internet connection. The recommended browser is Microsoft Edge or Google Chrome.

Course objectives

Upon completion of this course, you will be able to:

- Describe the standard delivery.
- List the dimensions and weights of frame options.
- List connectivity and fieldbus options.
- Select enclosure classes.
- Recall power, voltage and current ratings.
- Apply safety regulations concerning the drive.

Main topics

- Standard delivery
- Dimensions and weights of frame options
- Connectivity and fieldbus options
- Enclosure classes
- Power, voltage and current ratings
- Safety regulations
