

## Motion NextMove PCI-2

### Current life cycle status

The NextMove PCI-2 motion controller is in the Limited phase since 1.12.2015 according to the ABB life cycle model outlined above.

### Life cycle plan

It is planned to keep NextMove PCI-2 in the Limited phase at least until the end of 2022, after which it will be transferred to Obsolete phase.

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

### Recommended actions

It is recommended to replace the existing installation with compatible latest generation product.

### Further information
