Optical DO sensor

Product service offerings

Measurement made easy

—
ADS430
Optical DO sensor

Introduction

This document provides an overview of the ADS430 optical dissolved oxygen (DO) sensor life-cycle phases, detailing ABB's availability to support this product now and in the foreseeable future.

The ADS430 optical DO sensor covers the following products:

Part number	Description
ADS430/	Optical DO sensor

Product life-cycle

ABB life-cycle policy for Continuous Water Analyzers

ABB’s range of [Water Analyzers](#) are designed for continuous evolution, and each of the individual products go through a defined life-cycle process.

Once the product has been removed from Active sale we will continue to support the product with spares for up to 10 years through the Classic and Limited life-cycle phase.

Where possible, we will endeavor to secure stock at the point of when the product has been removed from Active sale to support the installed base. However, it is important to note that during this period certain spares may no longer be able to be sourced due to component obsolescence issues outside of ABB control.

ADS430 service offerings through the product life-cycle

	Life-cycle management phase			
	Active	Classic	Limited	Obsolete
ADS430 optical DO sensor	Jun 2022	Jun 2024	Dec 2027
